

Problems:

1. “My Applications” shows “Unable to load your applications. Please try again”. If “Applied” is selected, and there is a company that the user applied for, then the application does appear, but the error message is still shown. The same for the other tabs. (Also, Skill Gap Analysis is empty for some reason, not sure if that is broken, or intended).

2. My Profile

- Uploading avatar does not work, it fails with error: “Error uploading avatar: Phase 5 routes file uploads through /api/files per MergePlan \$4”

University: University of Bucharest

Graduation Year: 2022

Country: Romania

City: Bucharest

Personality Test Result: AI/ML Engineer

Error uploading avatar: Phase 5 routes file uploads through /api/files per MergePlan \$4.

See Public Profile

Skill Tests

- "Save Profile" does not work, neither from the "My Profile", nor from "Edit Profile" (why are these 2 even separate?). It fails with error: "Error saving profile: Response status code does not indicate success: 500 (Internal Server Error)".

Projects

Extra-Curricular Activities

Motivation

Describe your motivation...

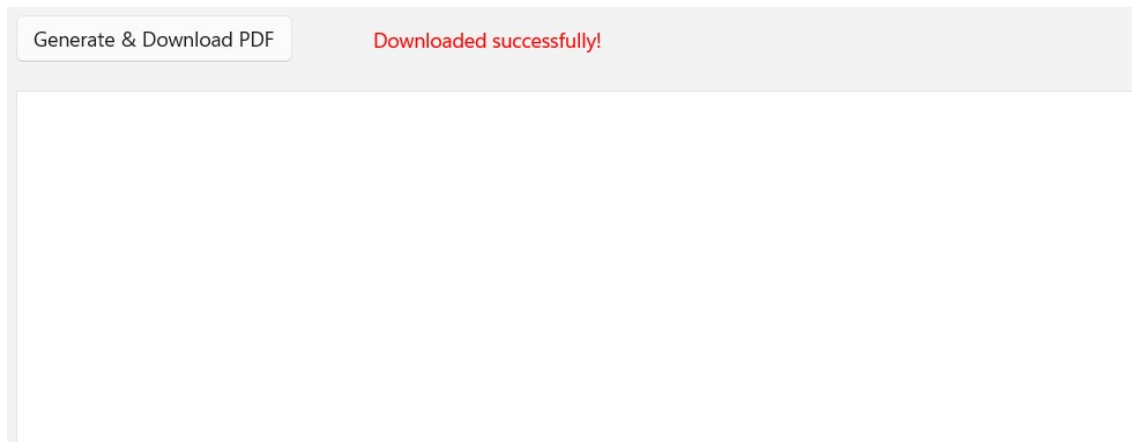

Error saving profile: Response status code does not indicate success: 500 (Internal Server Error).

Edit Job Preferences

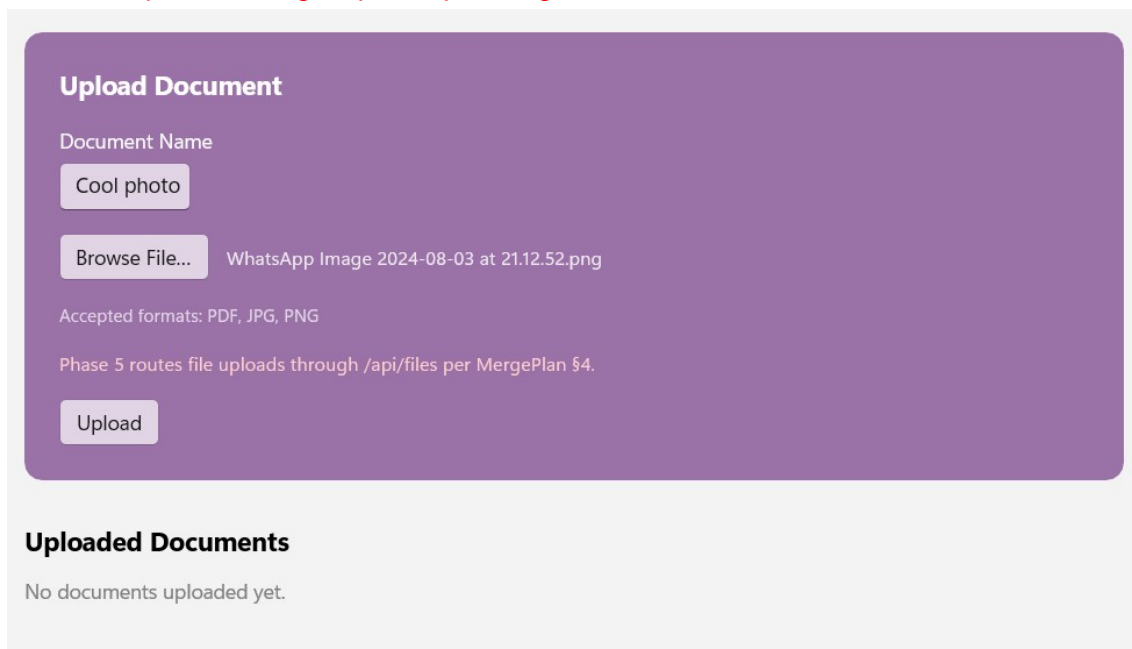

Cancel

Save Profile

- "Download Profile as PDF" does not work - the preview is blank. The download does succeed, but the document is empty.

- "Upload Document" does not work, it fails with error: "Error uploading avatar: Phase 5 routes file uploads through /api/files per MergePlan \$4"

- "Skill Test Results" in "Public Profile" is empty, nothing is shown.

Skill Test Results

- "Skill Tests" (both in "My Profile" and in a separate tab), are completely empty. (Again, this might be better if we kept only one of them, idk).

Skill Tests

- Export CV (again, nothing works, just like download Download Profile, I believe they are the same thing). The document is downloaded, but it is empty.

3. Company

- Review applicants says there are no applicants (may be because lack of data in the database, idk if its a bug).

- Applicant Status - Applicant List is empty (not sure if its a bug or because lack of data in the database). When clicking "Refresh" it says Company mode is not active, even though it should be

This is an error that appears in the console when I try to save the profile:

```
fail: Microsoft.AspNetCore.Diagnostics.DeveloperExceptionPageMiddleware[1]
      An unhandled exception has occurred while executing the request.
      System.InvalidOperationException: The instance of entity type 'User' cannot be tracked
      because another instance with the same key value for {'UserId'} is already being tracked.
      When attaching existing entities, ensure that only one entity instance with a given key value
      is attached. Consider using 'DbContextOptionsBuilder.EnableSensitiveDataLogging' to see
      the conflicting key values.
